

## **Dr. Alex Pulkownik**

Dr. Alex is a biochemist with a specialist interest in environmental sustainability. Over the past 20 years she has been involved in a range of research projects and research consultancies in estuarine plant ecology and plant ecotoxicology. Alex is currently an Honorary Associate of the Faculty of Science and the Project Coordinator and presenter of short courses for contaminated site professionals in Contaminated Site Assessment, Remediation and Management programs, offered by the Faculty with the support of NSW Department of Environment, Climate Change and Water. At various times in the past she has been Head of Department, Associate Head of Department, Course Director of both undergraduate and postgraduate courses, and First-Year Coordinator. She has taught widely in the environmental science area at UTS, both at undergraduate and postgraduate levels.
